No. 04-065

May 28, 2004

### **NRC ANNOUNCES AVAILABILITY OF LICENSE RENEWAL APPLICATION FOR NINE MILE POINT NUCLEAR STATION, UNITS 1 AND 2**

The Nuclear Regulatory Commission announced today that copies of an application for a 20-year renewal of the operating licenses for Units 1 and 2 at the Nine Mile Point Nuclear Station are available to interested parties. The licensee, Constellation Energy Group, submitted the application on May 27.

The Nine Mile Point plant is located near Oswego, N.Y., and the current operating licenses for Units 1 and 2 expire on August 22, 2009, and October 31, 2026, respectively.

The application is available on the NRC Web site at this address:

<http://www.nrc.gov/reactors/operating/licensing/renewal/applications.html> .

In addition, a copy of the license renewal application will be available at the Penfield Library Reference and Document Department, State University of New York, in Oswego.

The NRC staff is currently conducting an initial review of the application to determine whether it contains enough information for the required formal review. If the application has sufficient information, the NRC will formally “docket,” or file, the application and will announce an opportunity to request a public hearing.

For further information, contact Rajender Auluck, Division of Regulatory Improvement Programs, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Mail Stop O11-F1, Washington, DC 20555; telephone (301) 415-1025.
